LAELIA ORCHIDS

These handsome orchids are native to the high mountains of South America, and demand for their proper growth & flowering COOL conditions. L. autumnalis is the first to

bloom early in the Fall, and some members of the family is in bloom until late Spring. The blossoms are arranged four to six on a spray, and they are of good size measuring up to 6 inches in diameter in some species. They make excellent corsages, and are the type flower that people mean when they say 'Orchid'.

LAELIA AUTUMNALIS, purple flowers, 3-7 in number,

LAELIA ANCEPS, of the easiest culture with deep rose blooms,

LAELIA GOULDIANA, winter blooming natural hybrid of above two.

LAELIA ALBIDA, small waxy white flowers on robust plant in Spring.

LAELIA MAJALIS, small growing plant with large purple flowers, Spring.

PRICES, Medium blooming sized plants @ \$3.50, Large @ \$5. Postpaid

SPECIAL INTRODUCTORY OFFER

For those people who wish to start raising orchids for the first time, we offer introductory sizes of these easiest to grow plants as follows, LAELIA ALBIDA OR MAJALIS, @ \$2, plus 25¢ extra if special potting & osmundine material is desired. Many people have difficulty in obtaining the osmundine, and we will include it with the plants.

LAELIA COLLECTION, introductory sizes of Laelia Anceps, Albida Gouldiana, Majalis & autumnalis, \$10, plus \$1.25 extra if the potting material is desired. All prices Postpaid. Excellent value.

Laelia Cinnabarina, L. Crispa, L. purpurata are usually carried in stock, priced @ \$5, \$7.50 & \$10.00 depending on variety and size.

PHAIUS

PHAIUS, are absolutely the easiest species for beginners to grow. They are terrestrial orchids that thrive in ordinary soil but demand cool

shady locations and come from Asia. They carry from 20-30 flowers of about 3 inch in diameter from late Fall to summer. P. BICOLOR, large flowers brown, white lip bordered

rose, yellow throat, grows 4 ft tall in late summer. P. Blumei, like bicolor, but color light yellow in Spring. P. grandifolius, Yellow brown flowers on tall spike in late Spring. P. maculatus, handsome plant only grows 18 inches tall, light green foliage brightly spotted lemon yellow, flowers yellow lip blotched red in

Spring. P. Mishmiensis, elongated attractive stems, with light green leaves, look like sugar cane, about 2 ft tall, very beautiful rose colored flowers in Autumn. P. Wallichii, Flowers light orange yellow, lip purplish brown, outside white, in Spring. PRICES: Medium sized flowering plants @ \$3.50 & \$5. INTRODUCTORY SIZES, P. Mishmiensis & P. Wallichii, @ \$2, POSTPAID.

COELOGYNE

COELOGYNE are easy to grow epiphytes from the mountains of Asia, that require cool shaded growing conditions, but do best in a plant room or greenhouse. Four inch

flowers, usually white, are carried in sprays of 4-6 blossoms. C. barbata, Large white flowers in Autumn. C. Corymbosa, white with yellow eyes, early summer. C. cristata, very popular fragrant white blossoms with yellow blotch, midwinter. C. flaccida, creamy white, early summer. C. fuscens, pale brown, suffused red, late autumn. C. oculata, large white scented. C. ochracea, white

with yellow speckles. C. ovalis pale brown, lip blackish brown in early Autumn. C. rigida, white, mid-winter. PRICES. Medium plants, @ \$3.50, larger \$5, any 3 for \$10. INTRODUCTORY SIZES @ \$2, any five for \$10. 25¢ additional if special potting material required.

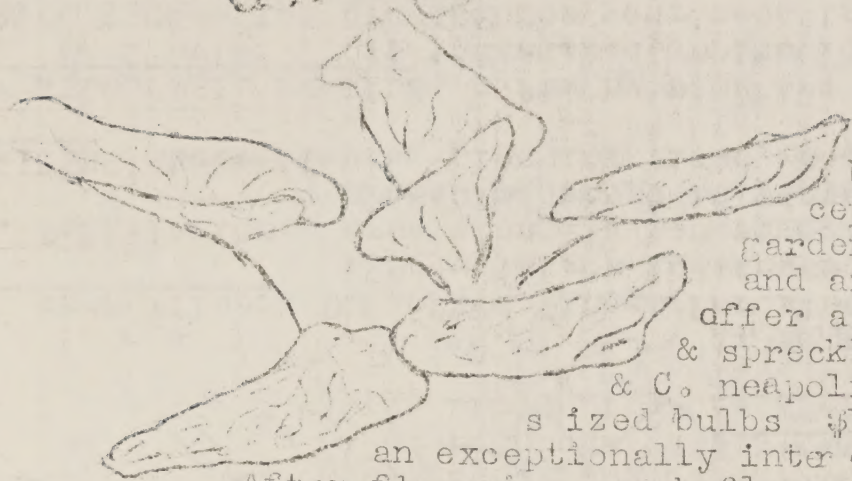

BEGINNERS COLLECTION SPECIAL 3 PLANTS, easy to grow \$5, consisting of 1 Laelia, 1 Phaius and 1 Coelogyne, plus 50¢ additional for special potting material, if required, postpaid.

ODONTOGLOSSUMS & ONCIDIUMS ARE ALSO AVAILABLE, MODERATLY PRICED.

CUSTOM INCUBATION SERVICE FOR YOUR SEED, OR FLASKS OF SEEDLINGS.

JULIA G. SEIDE, 16 GALLISON AVENUE, MARBLEHEAD, MASSACHUSETTS, USA.

HARDY GARDEN CYCLAMEN

THESE HARDY GARDEN GEMS are identical to the well-known florists' Cyclamen, except these are hardy in the garden, even in coldest conditions, and are a bit smaller in size. We offer a collection of red, pink, white & speckled of *C. repandum*, *C. europeum* & *C. neapolitanum*, three large blooming sized bulbs \$1.25 PP. These plants have an exceptionally interesting growth characteristic.

After flowering, each flower forms a single large seed, and the stem coils up, like a watch spring in an attractive fashion to draw seed to the ground. Readily hybridize from white to pink. Whatever color you receive, you may rest assured that at the end of a few years, by self seeding, these long lived little plants will have formed large clumps of all colors.

RARE VARIETIES: AUTUMN FLOWERING: *C. cilicicum*, pink with carmine eye, small rounded deep green leaves, silvery zone, purple under, \$1.00 ea.
C. Neapolitanum album: flowers vary from pale flesh to white, succeeded by silver-marbled foliage. \$1.50 ea. SEEDS \$1.00 packet.
SPRING FLOWERING: *C. coum*, green foliage deep rose flowers \$2.00 ea.
C. coum roseum, flowers vary from light rose to pink. \$1.50 ea. Seed \$1.00
C. ibericum roseum, foliage more or less silver, rose color, \$1.25 ea.
MIXED collection of seed 75¢ packet

AFRICAN PLANTS

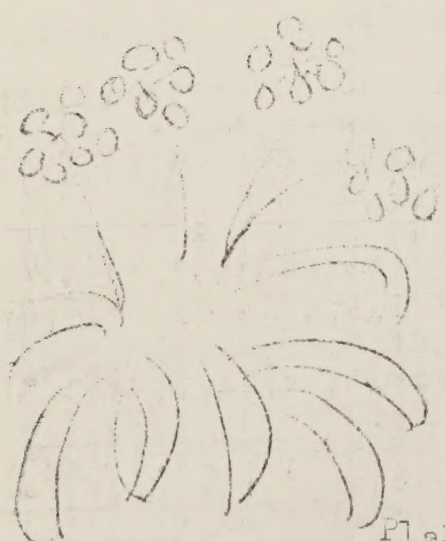

TULBAGHIA FRAGRANS

TULBAGHIA FRAGRANS, is a smaller edition of the large African A. apanthus family. It is an attractive little plant, with light green strap shaped leaves, up to 12 inches tall, admirably adapted for pot culture. The extremely fragrant lilac flowers are carried in attractive umbels above the foliage, and looks like a tinted Narcissus. The plant blooms repeatedly over a long period of time, beginning in the Fall. Plants are evergreen, & hardy in the South, 3 blooming sized bulbs \$1.25 PP.

PROLIFER UNIFORMIS - Blue-white flowers
 in flower - excellent for pot culture
 6-7-00

AGAPANTHUS

BLUE LILLY OF THE NILE. This is the old-fashioned plant so popular in Grandma's day. We offer a variety of forms, suitable for pot culture up to 18 inches tall, and the standard forms 3-5 feet in height.

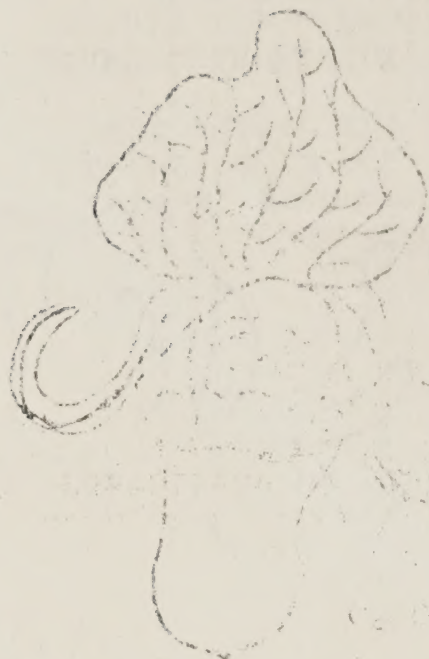

The plant is always striking in appearance, with rich dark green foliage, topped with large umbels of the lovely flowers, that are either the purest white, with yellow centers, of light or dark blue.

Plants are of the easiest culture, vigorous growers, and make very large clumps.
 Prices, Standard sized bulbs, varying degrees of blue, & \$1. PP.
 Dwarf & semi dwarf types, white or blue, your choice, best suited for pot culture in apartments & houses, & \$2. PP

AMARYLLIS FAMILY, we offer in addition to the above, other members of this large family, including Nerines, and the striking Spring blooming large bold red, Vallota purpura. They are offered on other sheets.

HOZE SPRAY is a sensational and unique method of spreading foliar

CYPRIPEDIUM

CYPRIPEDIUM are handsome terrestrials, whose name is derived from Greek, meaning 'Venus' foot', referring to the large pendulous lip. These plants demand cool, moist shaded growing conditions.

SPECIES & HYBRIDS

CYPRIPEDIUM ELIATUM, shell-shaped flower, white, profusely spotted purple, long lasting in late summer.

C. puberulum, yellowish green, tinged with purple and spotted brown purple in late Spring.

C. acaule, white suffused with brown purple, long lasting in late summer.

C. pubescens, most elegant & dainty species. Sepals ciliate white, veined purple, autumn.

C. virginicum, large flowers, tall spike, autumn.

C. hirsutissimum, purple flower, margined green, ciliated and marked in black, long lasting in late summer.

C. insigne, most popular, easy to cultivate. Apple green, spotted (winter) brown purple beautiful spotted, margined white.

C. Parishii, straw colored, pale green veins, several on a spike, (summer) petals pendulous, twisted, ciliated, margin purple.

C. venustum, greenish flower, purple stripes, flushed pink, winter.

C. villosum, Glossy brownish purple flowers, upper sepal pale white.

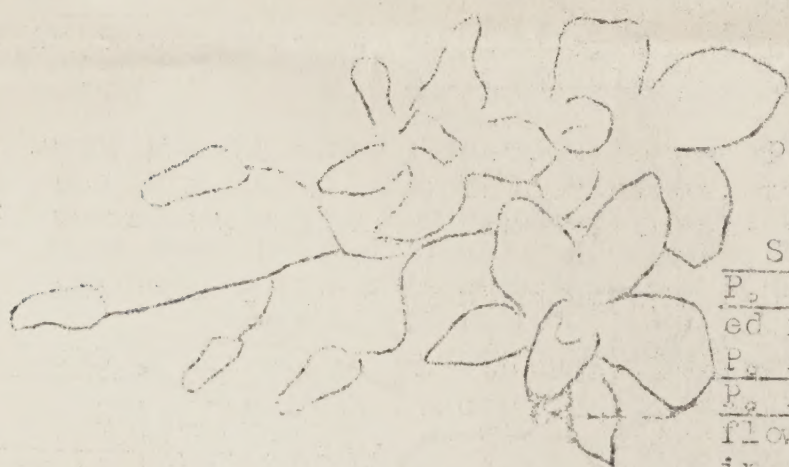

PRICES, all above plants \$4.50, larger plants \$7.50, postpaid.

CYPRIPEDIUM HYBRIDS, we have some very fine hybrids available in very limited quantities, too few to place in general catalogue. If interested, please write for descriptions & quotations.

ALPINE CYPRIPEDIUM SPECIES, these plants are very rare and unusual. They grow in a fashion similar to our 'Lady Slippers' but are more brilliantly colored. We can occasionally supply the following species, C. tibeticum, C. himalaicum, C. elegans, C. cordigerum and we can also supply liberal packets of seed. Prices of plants, \$7.50 and \$5.00 seed, liberal packet \$5.00. These plants should be hardy in the South, and sheltered positions in North. On special order, we will supply 250cc flasks of mixed seedlings, about 200 for \$12, and our usual sized 750 flasks, 650 seedlings, \$25.

MOTH ORCHIDS

PHALAENOPSIS

Much admired for beauty & elegance. Epiphytes, that love moisture & shade. These plants require high temperatures and high humidity. Only for greenhouse culture.

SPECIES

P. amabilis, Large white red spotted flowers in winter.

P. Mannii, yellow barred brown, Summer.

P. Parishii, var lobii, small flowers on dwarf scape brown, center in summer.

P. grandiflora, One of the finest for size & beauty. Flowers white tinged yellow in winter.

P. Schilleriana, exceptionally handsome, mauve blooms on free branching scape in winter.

PRICES above plants, blooming sized, \$4.50, larger \$7.50.

PHALAENOPSIS HYBRIDS, a few hybrids are carried, too few to list, if interested, write for quotations.

CUSTOM INCUBATION SERVICE for your seed is available.

Can also offer good sized seedlings by color, White, Yellow, Red, etc. Please write your desires. Flasks, Seeds & Innoculation.

FERTILIZE EASILY WITH "HOZE-SPRAY"

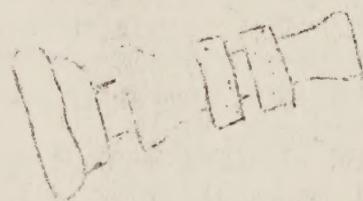

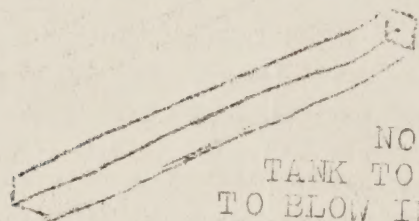

ABSOLUTELY NO WORK TO FERTILIZE YOUR LAWN,
ROSES, VEGETABLES OR ORNAMENTALS WITH HOZE-SPRAY.

Just load the HOZE-SPRAY cartridge inside the garden hose,
attach the whirling sprinkler and HOZE-SPRAY does the
rest!!! In this fantastically simple operation your
fertilizer is automatically mixed scientifically and spread
in one simple operation!

HOZE-SPRAY # 4 contains foliar fertilizer plus a special
patented spreader that makes the fertilizer S-T-I-C-K
where applied and actually coats the plants with a
covering of fertilizer material that acts over a long
period of time. 3 large long lasting cartridges \$ 1, PP

SPRAY WITH GARDEN HOSE!

NO MIXING, NO MEASURING, NO
TANK TO CARRY AROUND GARDEN, NO DUST
TO BLOW INTO YOUR FACE. Just load
HOZE-SPRAY Cartridge in garden hose,
attach nozzle, your spray is accurately,
scientifically & effortlessly mixed as you
spread it. Contains special spreader to make spray
stick, even during rain.

HOZE-SPRAY # 1, contains Bordeaux, Arsenate, Fermete & Nicotine,
intended for roses, tomatoes & ornamentals.
3 Large long lasting cartridges, used once
a week will last all summer, \$1, PP.

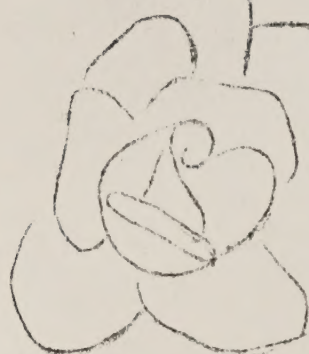

HOZE-SPRAY # 2, Above, PLUS Foliar Fertilizer. Combines spray
protection with fertilization, invaluable in
orchid culture, where it combines humidity
control, spraying & fertilization. 3 cart. \$2, PP

HOZE-SPRAY # 3, Rotenone, Pyrethron & Nicotine cartridges,
intended for use on edible vegetables, 3 cart. \$1.

Note. HOZE-SPRAY requires no machinery to apply. It is designed
to fit inside a 5/8th garden hose with full flow coupling. Many
people do not have this size garden hose, and for those we
supply a coupled hose container for HOZE-SPRAY cartridge of
proper size for \$1, PP.
